

9101 PIR Sensor Controller

Product Picture:

Wiring Method:

Specification:

- Input voltage: DC5-24V.
- Input current: $\leq 5A$
- Input Watt: $\leq 60W$
- Sensitive time: ≤ 30 seconds
- Sensing distance: $\leq 2-5$ meter
- The installation mode: Built-out or recessed in
- Cut hole: $\varnothing 12mm$ (all color in this cut hole size)
- Function mode: On and off motion sensor

The controller is available in black, white and silver.
Can be used with: cabinet lamp, light strip, shelf lamp, wardrobe, wine cabinet lamp, intelligent multi-way LED light sub-control/ total control / dual-color temperature controller. And other interior decoration lighting, necessary for home decoration.
